SMART SOLUTIONS

EN

TST Group Worldwide

Founded over 30 years ago, we now have a Production Facility that occupies over 11.700 sq m². Our broad range of products are designed, manufactured and constantly developed under the same roof, to meet the needs of our Worldwide Customers.

tst is fully integrated manufacturer of quick connect/disconnect couplings, for hydraulic, pneumatic, vacuum, gas, chemical fluid and water applications; in addition to multi couplers, fittings, hoses and accessories.

The latest technologies are utilized to Manufacture and Assembly our wide range of products to the required specifications to achieve Zero Defects and 100% Delivery Performance.

DE

TST Gruppe weltweit

Gegründet vor 30 Jahren verfügen wir mittlerweile über eine Produktionskapazität auf Basis modernster CNC Technik auf über 11.700 m² Fläche. Um die Ansprüche unserer weltweiten Kunden zu erfüllen, sind Entwicklung und Produktion am gleichen Standort eng miteinander verbunden.

tst ist ein Hersteller von Schnellverschlusskupplungen für die Bereiche Hydraulik, Pneumatik, Vakuum, Gas, chemische Anwendungen, sowie Wasserapplikationen. Dies umfasst sowohl Einzelkupplungen als auch Multikupplungen, Verbindungselemente, Schläuche und Zubehör.

Um bei unserer breiten Angebotsvielfalt sowohl in der Herstellung als auch in der Montage absolute Liefertreue bei einer Fehlerquote von 0 ppm zu erreichen greifen wir auf modernste Fertigungsmethoden, langjährige Mitarbeitererfahrungen und einen sehr jungen Maschinenpark (vornehmlich CNC Technik) zurück.

FOR INDUSTRIAL CONNECTIONS

FR

TST, un groupe international

La Société TST fondée depuis plus de 30 ans dispose d'un site de fabrication de plus de 11.700m² où l'ensemble des produits sont dessinés, fabriqués et où le service développement est sans cesse à l'écoute des clients.

tst dispose de l'ensemble des produits coupleurs rapide comme le coupleur air, eau industrie ainsi que les coupleurs spéciaux "plasturgie" ou "hydraulique" ainsi que les gammes multi-connecteurs, manifolds, tubes, colliers et accessoires.

Toutes les technologies à la pointe de la technique sont utilisées sur toutes les phases de conception et production afin de vous assurer 100% de satisfaction quant à la performance des produits.

NL

TST, een wereldwijde organisatie

30 jaar geleden werd TST opgericht, inmiddels beschikken we over een productiefaciliteit die meer dan 11.700m² in beslag neemt.

Om te kunnen voldoen aan de behoeftes van onze wereldwijde klanten wordt ons brede assortiment aan producten onder één dak ontworpen, geproduceerd en doorontwikkeld.

tst is producent van snelkoppelingen, voor hydraulische, pneumatische, gas, vacuüm, chemische vloeistoffen en water-gerelateerde toepassingen. Daarnaast produceert TST ook enkele koppelingen, meervoudige koppelingen, verbindingselementen, fittingen, slangen en overige toebehoren.

Symbol of Types

Symbol Index

EN	DE
B TYPE	B Typ Double Shut Off Series Couplings Both plug and coupling include the valve therefore self sealing is obtained regardless of the direction of flow. During disconnection, the flow will be blocked by the valves. B Typ doppelseitig absperrende Kupplungsreihe Sowohl der Nippel wie die Kupplung sind mit einem Ventil versehen, so dass die Abdichtung unabhängig von der Durchflussrichtung sichergestellt werden kann. Nach dem Entkuppeln wird der Durchfluss durch das Ventil gesperrt.
D TYPE	D Type Double Shut off Couplings Both plug and valve include the valve therefore self sealing is obtained regardless of the direction of flow. During disconnection, the plug must be pushed into the coupling which provides a safety feature preventing accidents in medical applications. D Typ doppelseitig absperrende Kupplung Sowohl der Nippel als auch das Ventil umfassen das Ventil, so dass unabhängig von der Strömungsrichtung eine Selbstabdichtung erzielt wird. Während des Trennens muss der Nippel in die Kupplung geschoben werden, was eine Sicherheitsfunktion bietet und die Unfälle in medizinischen Anwendungen verhindert.
E TYPE	E Type Single Shut Off Couplings Only the coupling includes valve therefore used in systems where the flow direction is from coupling to plug. During disconnection, the plug must be pushed into the coupling which provides a safety feature. E Typ einseitig absperrende Kupplung Nur die Kupplung enthält ein Ventil, das daher in Systemen verwendet wird, bei denen die Durchflussrichtung von Kupplung zu Nippel verläuft. Beim Entkuppeln muss der Stecker in die Kupplung gedrückt werden, was eine Sicherheitsfunktion bietet.
F TYPE	F Type Thru-flow Couplings Coupling and plug do not include valve therefore no sealing is obtained. This type is generally used where sealing is not important. F Typ Kupplung mit vollem Durchgang Kupplung und Nippel sind ventillos, daher wird keine Dichtung erreicht. Dieser Typ wird im Allgemeinen verwendet, wenn nur die Verbindung, jedoch nicht die Abdichtung im Vordergrund steht.
K TYPE	K Type Coded Couplings Coupling and plug have geometrical connection designs which only enables same geometrical shapes connect each other. This type prevents mismatches. Self sealing is optional. Please contact us to clarify which sealing option you prefer. K Typ Kodierte Kupplung Kupplung und Nippel haben geometrische Verbindungsdesigns, die nur die Verbindung derselben geometrischen Formen ermöglichen. Dieser Typ verhindert Fehlverbindungen. Selbstdichtende Versionen sind optional erhältlich. Kontaktieren Sie uns, um zu klären, welche geometrische Form Sie bevorzugen.
L TYPE	L Type Coded Couplings Both coupling and plug include the valve and they close simultaneously while disconnection. The unique valf designs both sides prevent leakage during disconnection and obtain dry break. L Typ kodierte Kupplung Kupplung und Nippel haben beide flachdichtende Ventil und schliessen gleichzeitig ab beim Entkuppeln. Entkuppeln ist leakagefrei.
S TYPE	S Type Coded Couplings Only the coupling includes valve therefore used in systems where the flow direction is from coupling to plug. Generally used in push-button couplings where a secure disconnection is required. Disconnection of the plug is possible only after two consecutive pushes; one for releasing the residual pressure and the second one to eject the plug. S Typ kodierte Kupplung Nur die Kupplung enthält ein Ventil, daher die Verwendung, bei denen die Durchflussrichtung von Kupplung zu Stecker verläuft. Wird im Allgemeinen in Druckknopfkupplungen verwendet, bei denen eine sichere Trennung erforderlich ist. Das Lösen des Steckers ist nur nach zwei aufeinanderfolgenden Drücken (zwei Stufen) möglich. Eine zum Ablassen des Restdrucks und die zweite zum Auswerfen des Stopfens.

	FR	NL
B TYPE	Type B série double obturation Le coupleur et l'embout disposent tous les deux de clapet. Par conséquent, l'étanchéité est obtenue quel que soit le sens du débit. Lors de la déconnexion, le débit sera bloqué par les clapets.	Snelkoppeling met dubbele klep, type B Zowel de insteeknippel als de snelkoppeling hebben een klep, waardoor de snelkoppeling zelfsluitend is ongeacht de stroomrichting. Bij het ontkoppelen blokkeren de kleppen de doorstroom.
D TYPE	Type D série double obturation à sécurité de désaccouplement. Le coupleur et l'embout disposent tous les deux de clapet. Par conséquent, l'étanchéité est obtenue quel que soit le sens du débit. Lors de la déconnexion, le débit sera bloqué par les clapets. Il faut agir sur la bague et sur l'embout simultanément pour désaccoupler en sécurité, évite tout désaccouplement intempestif, très employé dans les application médical.	Snelkoppeling met dubbele klep, type D Zowel de insteeknippel als de snelkoppeling hebben een klep, waardoor de snelkoppeling zelfsluitend is ongeacht de stroomrichting. Bij het ontkoppelen moet de insteeknippel in de snelkoppeling worden gedrukt; dit is een veiligheidsvoorziening die bij medische toepassingen ongevallen kan voorkomen.
E TYPE	Type E série simple obturation à sécurité de désaccouplement. Le coupleur dispose d'un clapet, embout passage libre. Il faut agir sur la bague et sur l'embout simultanément pour désaccoupler en sécurité, évite tout désaccouplement intempestif, très employé dans les applications médicales.	Snelkoppeling met enkele klep, type E Alleen de snelkoppeling heeft een klep; daarom wordt deze snelkoppeling gebruikt in systemen waarin het medium van de snelkoppeling naar de insteeknippel stroomt. Bij het ontkoppelen moet de insteeknippel in de snelkoppeling worden gedrukt; dit is een veiligheidsvoorziening.
F TYPE	Type F série passage libre Le coupleur et l'embout ne disposent pas de clapet, donc aucune étanchéité n'est obtenue. Ce type est généralement utilisé lorsque l'étanchéité n'est pas importante.	Volle-doorlaatsnelkoppelingen, type F Snelkoppeling en insteeknippel hebben géén klep. Dit type wordt in het algemeen gebruikt als het afsluiten van de doorstroom niet belangrijk is.
K TYPE	Type K Accouplements codés à détrompeur Le coupleur et l'embout ont des conceptions de connexion géométriques qui ne permettent de connecter que les mêmes formes géométriques, et dispose d'un repère couleur. Ce type empêche les inversions de connexion. Veuillez nous contacter pour option de joint.	Gecodeerde snelkoppelingen, type K De snelkoppeling en de insteeknippel zijn voorzien van een geometrische vorm, waardoor alleen identieke geometrische vormen met elkaar gekoppeld kunnen worden. Hierdoor kunnen geen foute koppelingen worden gemaakt. Zelfafsluitende modellen zijn verkrijgbaar. Neem contact met ons op als u wilt weten welk type koppeling voor u de beste keuze is.
L TYPE	Type L série double obturation face plane, zéro gouttes. Le coupleur et l'embout disposent tous les deux de clapet. Par conséquent, l'étanchéité est obtenue quel que soit le sens du débit. Lors de la déconnexion, le débit sera bloqué par les clapets face plane assurant aucune fuite à l'accouplement ou désaccouplement.	Gecodeerde snelkoppelingen, type L Zowel de snelkoppeling als de insteeknippel hebben een klep, en beide kleppen sluiten bij het ontkoppelen gelijktijdig af. Het unieke ontwerp van de klep voorkomt lekkage bij het ontkoppelen, zodat 'droog' ontkoppeld kan worden.
S TYPE	Type S série simple obturation à sécurité anti coup de fouet ISO 4414EN983 Seul le coupleur dispose de clapet, embout passage libre. Généralement utilisé dans les accouplements à bouton-poussoir où une déconnexion sécurisée est requise. La déconnexion de l'embout n'est possible qu'après deux poussées consécutives; un pour relâcher la pression résiduelle et un second pour éjecter l'embout.	Gecodeerde snelkoppelingen, type S Alleen de snelkoppeling heeft een klep; daarom wordt deze drukknopkoppelingen gebruikt in systemen waarin het medium van de drukknopkoppeling naar de insteeknippel stroomt. Dit type koppeling wordt in het algemeen gebruikt in toepassingen onder druk, waarbij veilig ontkoppelen vereist is. Het ontkoppelen van de insteeknippel is pas mogelijk nadat de drukknop twee keer achtereenvolgend ingedrukt is: één keer om de restdruk te laten vrijkomen en de tweede keer om de insteeknippel uit te werpen.

The pressure range vary for each product shown in this leaflet. Before ordering, please mention the application pressure to make sure the product meets the system requirements.

Temperature range of our products vary according to the sealing components chosen. Most common sealing types are listed below. For custom requirements, please contact us.

Is the actual diameter which fluid passes through. TST is capable of manufacturing products with nominal diameter of DN 2.5 mm's up to DN 75 mm's.

With Valve)

MATERIAL ICONS

SEALING OPTIONS

FPM : -26°C to + 200°C (not recommended for water steam)
NBR : -40°C to + 105°C
EPDM : -50°C to + 135°C
HT : -26°C to + 200°C (better durability for water steam up to 500 hours)
FFKM : -15°C to + 325°C

Icon Index

Security Icons

E1

The safety is provided by a pin on the sleeve to prevent disconnection by mistake.

E2

This is an upgraded version of E1.

E3

Safety is provided by an additional nut screwed to the back of the sleeve to prevent accidental disconnection.

2 STAGE

Security is provided by pressing the button two times or by left-right sleeve twist. First press/twist releases the pressure inside the coupling and the second press/twist ejects the plug for disconnection.

This design is normally used in systems where confusion is certainly avoided by the geometrical design in the interior touch points of both plugs and couplings.

SWING

This is a built-in safety design type founded by Oetiker Inc. working in principle of ball valves in rotation with a locking sleeve. TST acquired Oetiker Inc.'s quick coupling division in 2012.

WATERBLAST COUPLINGS

HOCHDRUCKWASSERSTRAHLEN KUPPLUNGEN

SERIE 047

DN 12

Materials

Material Code

A = Hardened Steel - Zinc Plated

B = Hardened Steel - Zinc Plated

S = Hardened Steel - Zinc Plated

0 - 700 bar

-40°C to + 105°C (NBR)

Shut Off Type

Applications

- Waterblast
- High Pressure
- Wireline - Grease Injection
- Water Jetting

Compatible with

DIXON EA
PARKER WB
AERO QUIP FD69
SNAP - TITE 56 SERIES

DN

12 mm

FLOW

180 lt/min

Screw Locking Model Manifold
Schraubverriegelung Multikupplung

If you want to change lever locking mechanism to screw type.
Please order MM 208 KS 00 for mobile side and MK 208 SM 00
for tool side.

Zum Umbau auf Spindelverriegelung bestellen Sie MM 208 KS 00,
für die mobile Seite und MK 208 SM 00 für die Werkzeugseite.

HOSES

SCHLÄUCHE

PLOK HOSES

Structure: NBR hose with reinforcement is kink resistant and flexible for hot and cold water.
No need to use clamps in combination with pushlock hose plug.

Struktur: NBR Schläuche mit Polyesterbewebung sind knickbeständig, biegsam und in Kalt- und Heisswasser einsetzbar. In Verbindung mit Schnellsteck - Schlauchtülle sind keine Schlauchschellen notwendig.

Working Temperature Range
-20°C to + 90°C

Rolls of 12m and 15m are also available upon request.

Betriebstemperaturbereich
-20°C to + 90°C

12m und 15m Rollen sind auch lieferbar auf Anfrage.

EPDM HOSES

EPDM SCHLÄUCHE

WHMDLOK HOSES

→ Hoses functionally works by pushing and locking for 130°C - with **smooth** surface

→ Steckschlauch für 130°C - mit glatter Oberfläche

Structure: EPDM hose with polyester reinforcement is kink resistant and flexible for hot and cold water. No need to use clamps in combination with pushlock hose plug.

Struktur: EPDM Schläuche mit Polyesterbewegung sind knickbeständig, biegsam und in Kalt-und Heisswasser einsetzbar. In Verbindung mit Schnellsteck - Schlauchtülle sind keine Schlauchschellen notwendig.

Conditions Temperature Range

-40°C to + 130°C

Intermittent Working Temperature

Up to + 140°C

→ Rolls of 12m and 15m are also available upon request.

→ 12m und 15m Rollen sind auch lieferbar auf Anfrage.

PUSH TO LOCK - HOSE ASSEMBLY TOOL

SCHLAUCH-MONTAGEWERKZEUG

SERIE HTA 10-13

PUSH TO LOCK - HOSE ASSEMBLY TOOL

SCHLAUCH-MONTAGEWERKZEUG

SERIE HTA 10-13

HOW IT WORKS

1

Insert the hose into the suitable groove in the hose housing and rotate the hose handle to clamp the hose down.

Suitable Ø10 hoses for the application are;
PLOK10 - PDLOK10 - WHMLOK10 - WHMDLOK10
and Ø12 hoses are; PLOK12 - PDLOK12 - WHMLOK12 - WHMDLOK12

2

Make sure the hose inlet is max 3 cm away from the housing in order to keep the hose inlet stable and ready for assembly.

The hose inlet can either be perfectly aligned with the housing or max 3 cm away from the housing for an easier assembly of couplings.

3

Place the coupling into the suitable coupling housing and make sure the accurate housing is installed on the tool. If not, please replace the housing with the other housing which you will find in the box.

The housing kit can either be for SK-CSK90, SK-CSK60-90, SK-CSK90-90, 100.08 or HK-HVK9-90, HK-HVK9,100.08-90 type of couplings.
EHF type of adaptors are also suitable for usage.

4

Rotate the coupling handle in order to have the coupling touch the hose inlet.

Once you are sure both are aligned, please push the flexible hose tail all the way into the hose.
